Project Overview

Everlight Radiology approached us to create the full CAD plans and quote for works needed at their new Leicester premises. We provided a competitive quotation for the full scope of works and won the project.

This project included the strip out of the existing premises, installation of solid and frameless glass partitioning, full decoration and flooring works. Part of this project scope also included installing a bespoke kitchen to the premises, as well as supplying and building all of the furniture required in the space.
