Project Overview

Westrock reached out to us to help them transform their office space into something more modern, so we held their hand through the whole process from the original planning and quotation through to the end result.

The project included a full strip out of the existing floors, partitions, furniture and ceiling tiles so we were able to install the new solid and glazed partitions, hard wearing carpets, vinyl, teapoint, furniture and new feature coloured ceiling tiles.

Customer Comment

ACI were the perfect partner for our project from start to finish. They listened to our challenging brief and worked with us every step of the way to enhance our ideas and deliver a truly amazing end result. The end result is exactly what we wanted to deliver and provides the perfect working environment for our team.
