## Project Overview

Aci were tasked with the refurbishment of the two of the companies meeting rooms at one of their Nottingham sites. The rooms were dated and needed a complete overhaul and also needed to bring the tech. up to date.

Imperial Tobacco also decided to compliment the design with switchable glass for the meeting room frontages. Here aci installed electronic glass that at the flick of a switch changed from clear to opaque.

Other additions to the meeting rooms included new Walnut furniture, and bespoke media walls with state of the art interactive white boards installed.

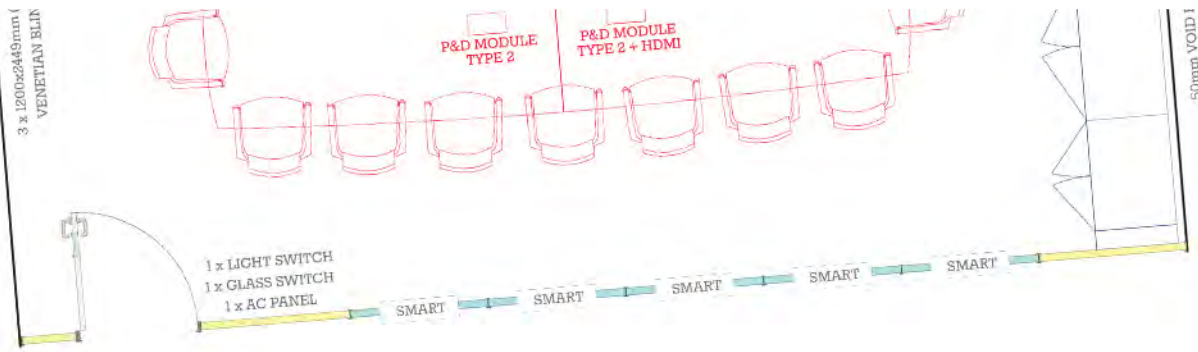

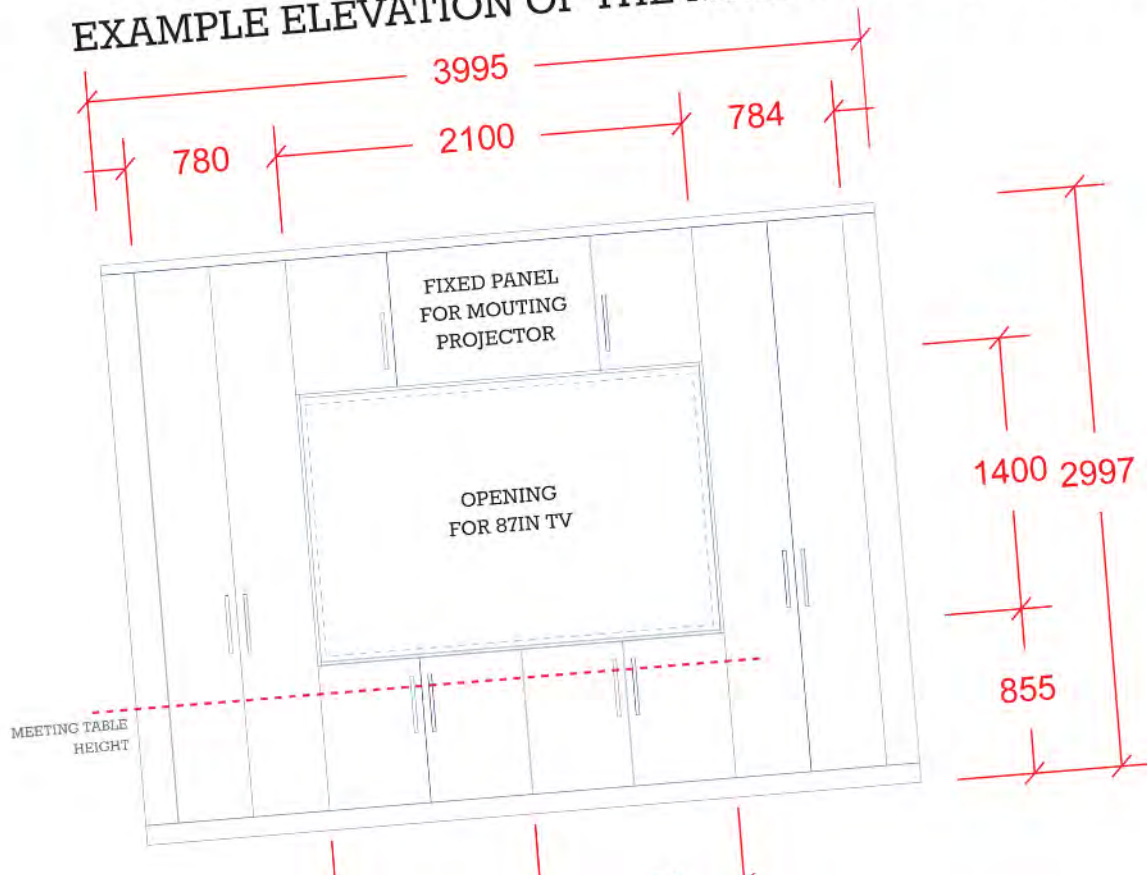

## Customer Comment

After working with aci for some years now we were sure that they were the right company to work with on our meeting room refurbishment project.

We worked closely with the team at aci and as a result they managed to interpret our requirements for a great result. Thanks again to the team.
