Office Fit Out Project Overview

With the government approval for Phase Two of the extension to Nottingham's tram system, Tramlink Nottingham required a new office facility with a specific remit to suit their growing needs and enable them to implement the major works on time and on budget.

aci™ were asked to provide space planning to cater for all of their needs along with competitive and detailed quotations.

Tramlink worked with aci™ in finding the most suitable location by testing various space planning solutions.

aci™ were appointed as main contractor for the project and were also asked to carry out other works by the landlord to separate the new unit.

Customer Comment

We were very pleased with the service ACI provided. Not only were they extremely good value for money, but they really understood our requirements and showed themselves to be flexible and responsive.

We are also delighted with the results of their work as it is of a very high quality.
