PROJECT OVERVIEW

Designed for car collectors, owners and luxury brands seeking the very best in automotive photography, videography, storage, maintenance and management ACI worked with the clients bespoke requirements to create this breath taking space. Featuring a car lift, various photo staging areas as well as top quality facilities for clients the space is unrecognisable from the outdated showroom it used to be. Crittall partitions help keep the space light and open and the feature black ceiling with flexible lighting create the perfect photographic backdrop. The clients own furniture is perfect for hosting, collaboration and relaxing.

STAIRCASE DETAIL

Adding a slick new powder coated black metal spiral staircase not only saves space but makes an impact and complements the new monochromatic scheme.
