PROJECT OVERVIEW

This was a full office refurbishment included WC for both ground and first floor. Initially, any existing partitions and flooring was removed where necessary to allow for the new modern design to be implemented.

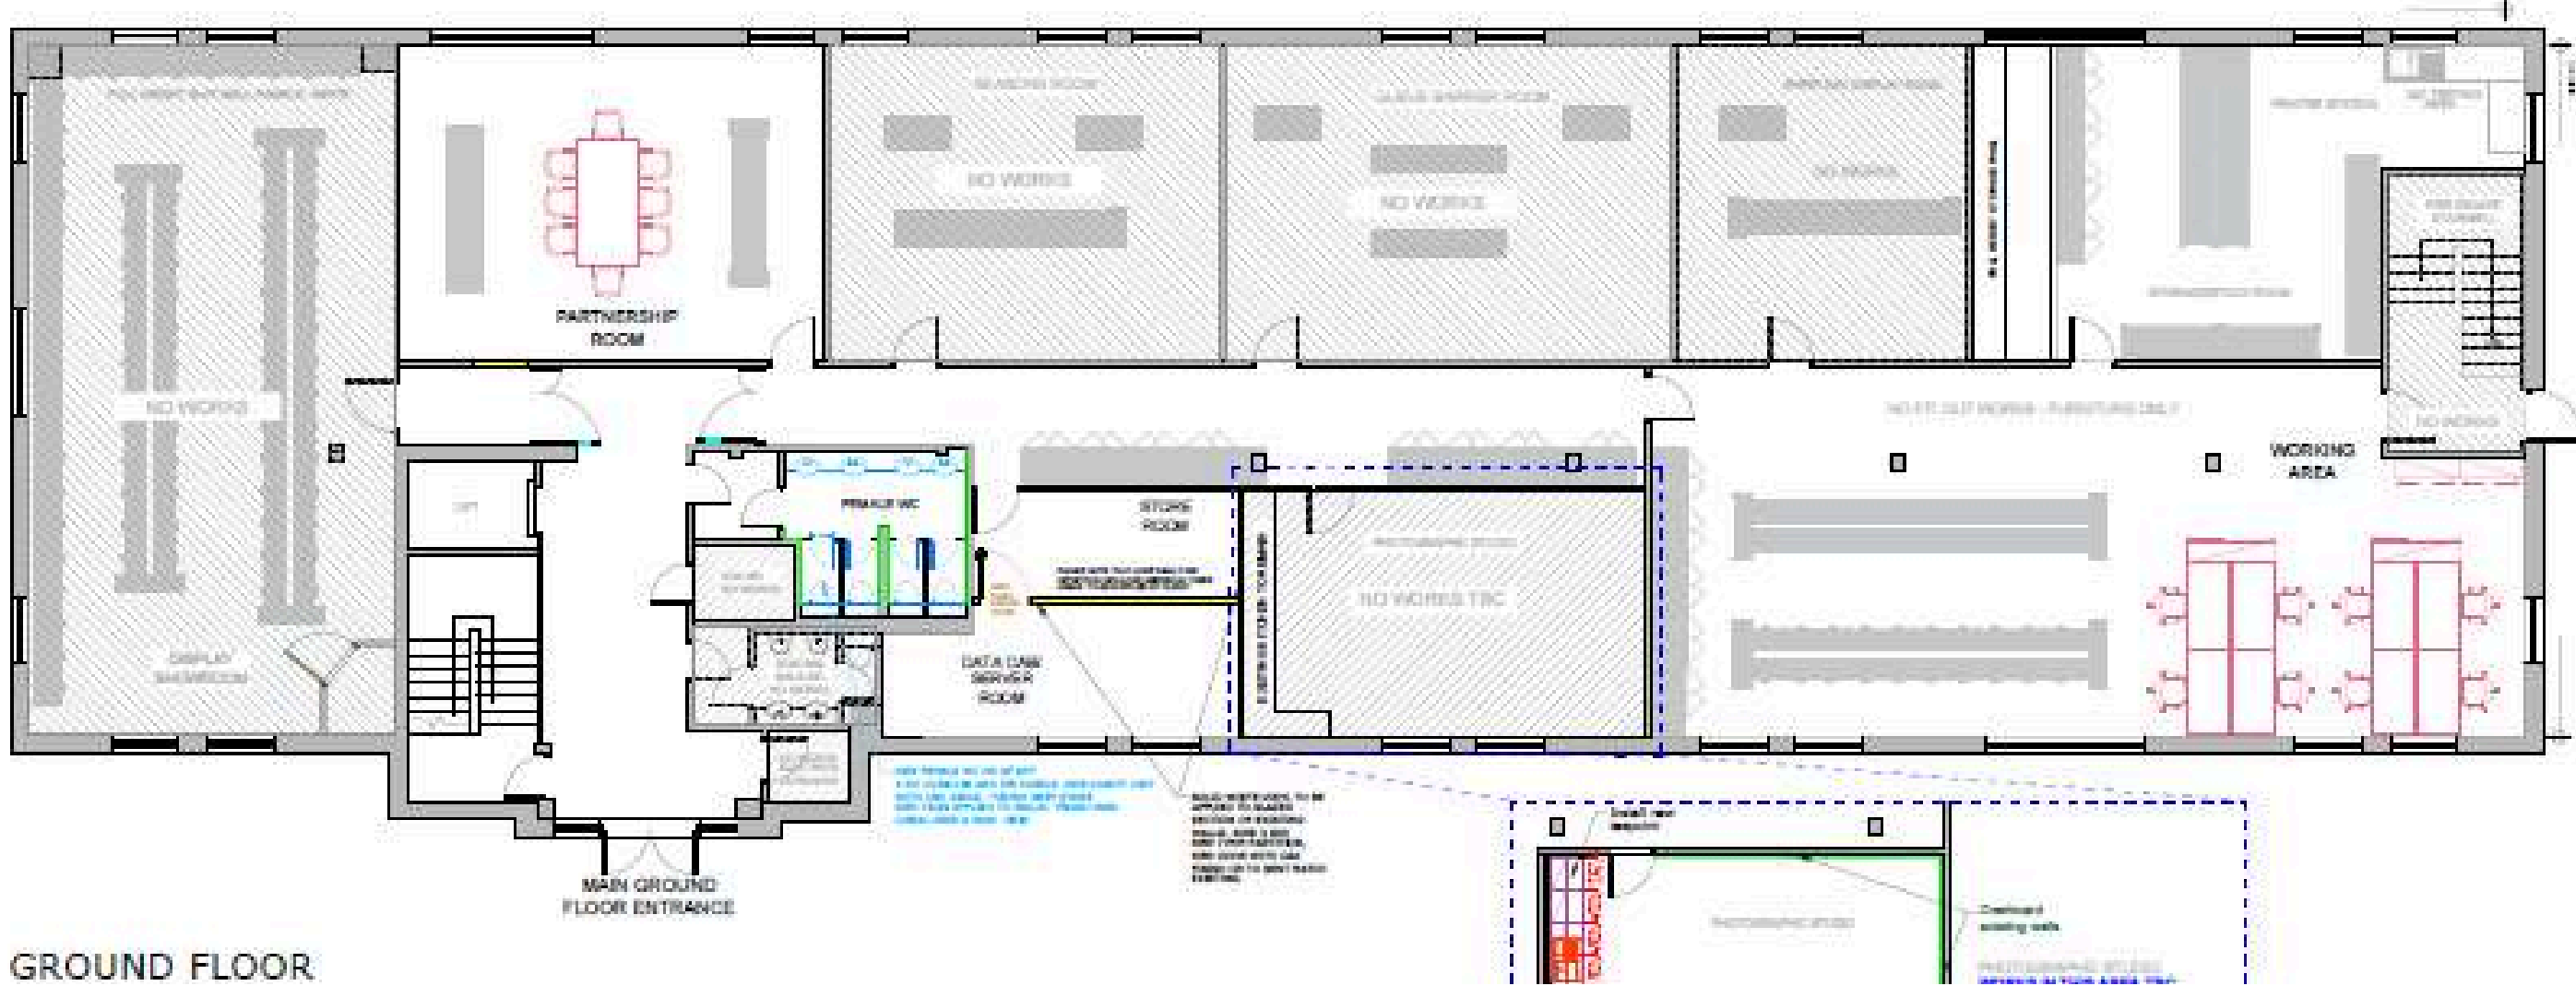

The new design included new carpet and LVT throughout, new kitchen area and furniture to suit each area.

In addition to the main fit out we also added some feature walls and acoustic panels as it was a large open space. The varied panels included hanging baffles and wooden wall slats in various colours to reflect the branding.
