

DSV

DSC Contract Logistics Ltd
Brackmills Office Fit Out

PROJECT OVERVIEW

ACI were appointed to deliver a comprehensive office fit-out for DSV Solutions at Brackmills Industrial Estate in Northampton. The project covered both ground and first floor areas, creating a more practical and adaptable workplace with new solid partitions, glazed office partitioning, fire-rated screens, oak veneered doors, tea points, meeting rooms, offices, shower and changing facilities, a first aid room and staff welfare spaces. The layout was designed to balance private offices, collaborative areas and day-to-day operational requirements, helping DSV make better use of the existing building.

PROJECT OVERVIEW

The project also included a wide range of finishes and feature details to give the completed space a professional, modern feel. Tea points were finished with white gloss fronts, solid surface worktops, integrated appliances and glass splashbacks, while shower rooms were fully tiled and selected areas received stone-effect LVT flooring. Feature green wall panelling, timber slat finishes, manifestation, roller blinds and specialist work pods helped bring warmth, texture and flexibility to the workplace, creating areas for informal meetings, collaboration and staff breakout.
