## PROJECT OVERVIEW

This project consisted of a full refurbishment and reconfiguration of a large multi-functional commercial building across both ground and first floor levels. The works involved extensive strip out and structural alterations to transform the existing layout into a modern, flexible environment incorporating conference facilities, breakout areas, café spaces, offices and support rooms.

**AFTER**

## PROJECT OVERVIEW

As part of the refurbishment, we carried out comprehensive HVAC, electrical, plumbing and ventilation works throughout the building, alongside the installation of new lighting, power and data infrastructure to support the new layout and operational requirements. The project also included the installation of a new mezzanine floor, platform lift and feature staircase to improve accessibility and maximise usable floor space.

**BEFORE**

## PROJECT OVERVIEW

In addition to the internal fit out works, we also completed external upgrades including new fire escape stairs, DDA access improvements and bespoke joinery to create a modern and functional environment for the client.
