## PROJECT OVERVIEW

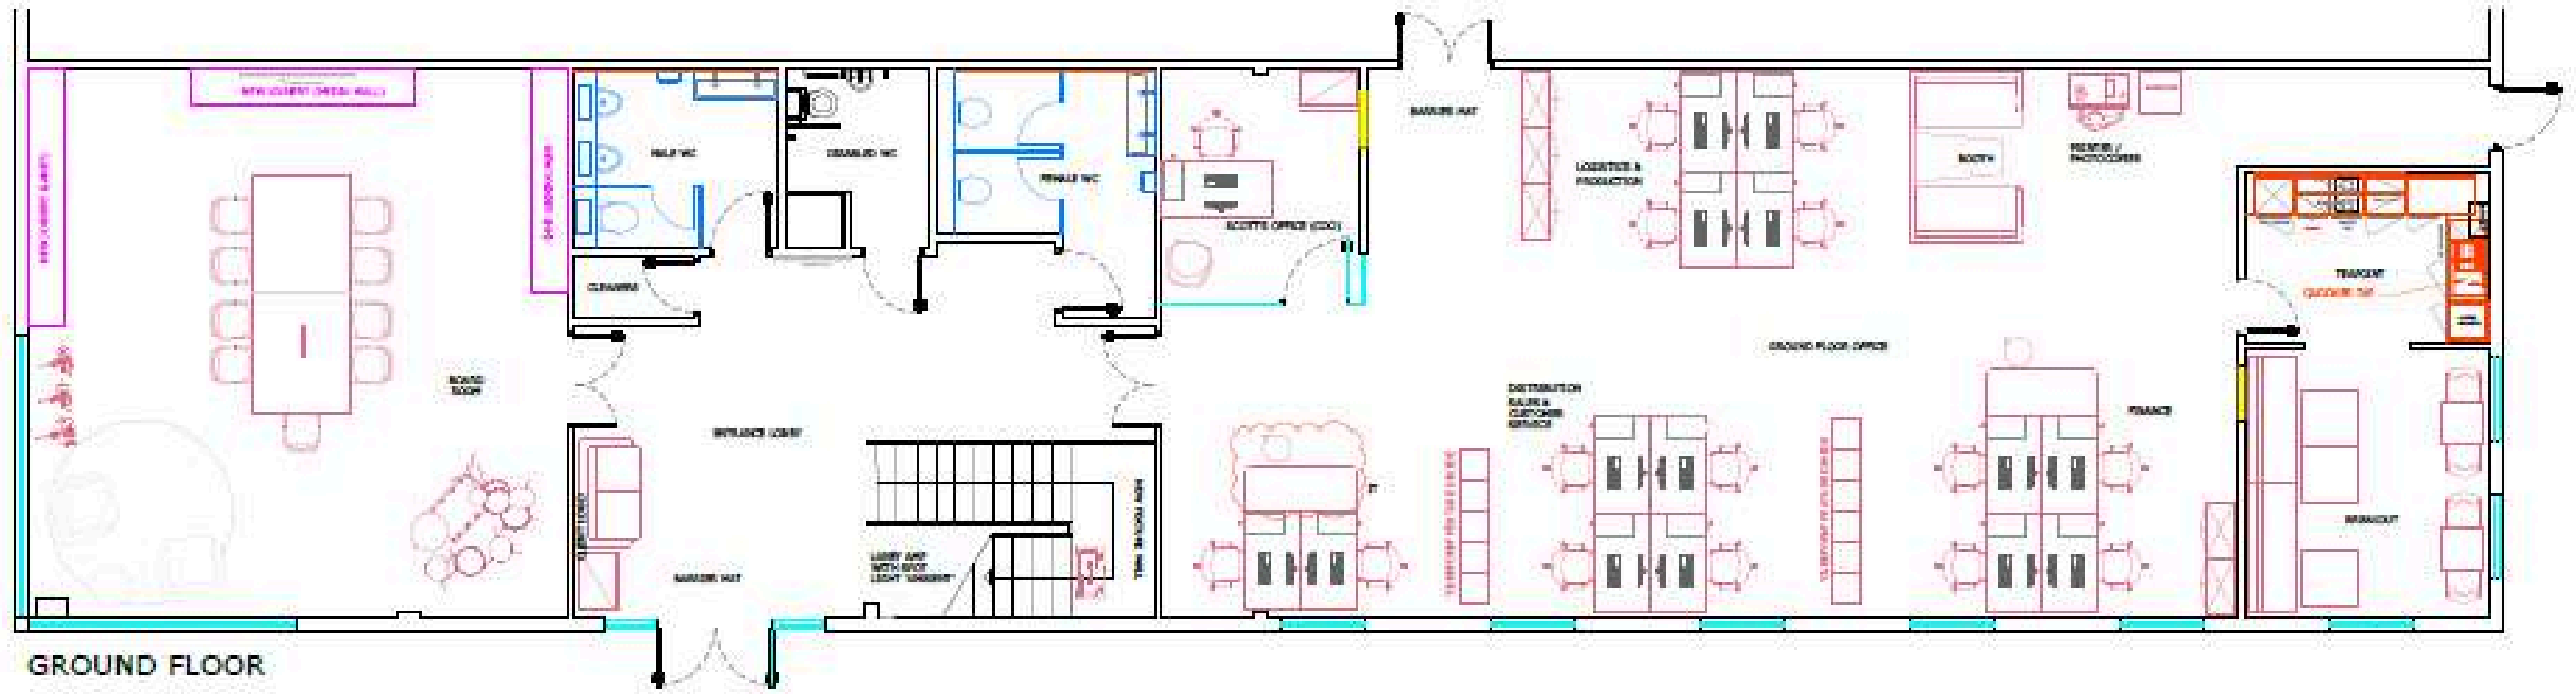

Headstock is a leading manufacturer and distributor of musical equipment and professional audio parts based in the heart of the UK distributing some of the biggest brands in music such as Ibanez and Zildjian.

ACI were chosen to provide a full office refurbishment for their main office in Halesowen, creating a space worthy of the company's rock star clientele and prestigious brand.

Featuring an office space, breakout areas, meeting rooms, washrooms and tea point, a colour palette of cool dark slate greys and warm mustard yellows creates a sophisticated feel that sets off the colourful displays of guitars, guitar pedals, amps and music paraphernalia, this is certainly a perfect working space for music fanatics!
