Office Furniture Installation

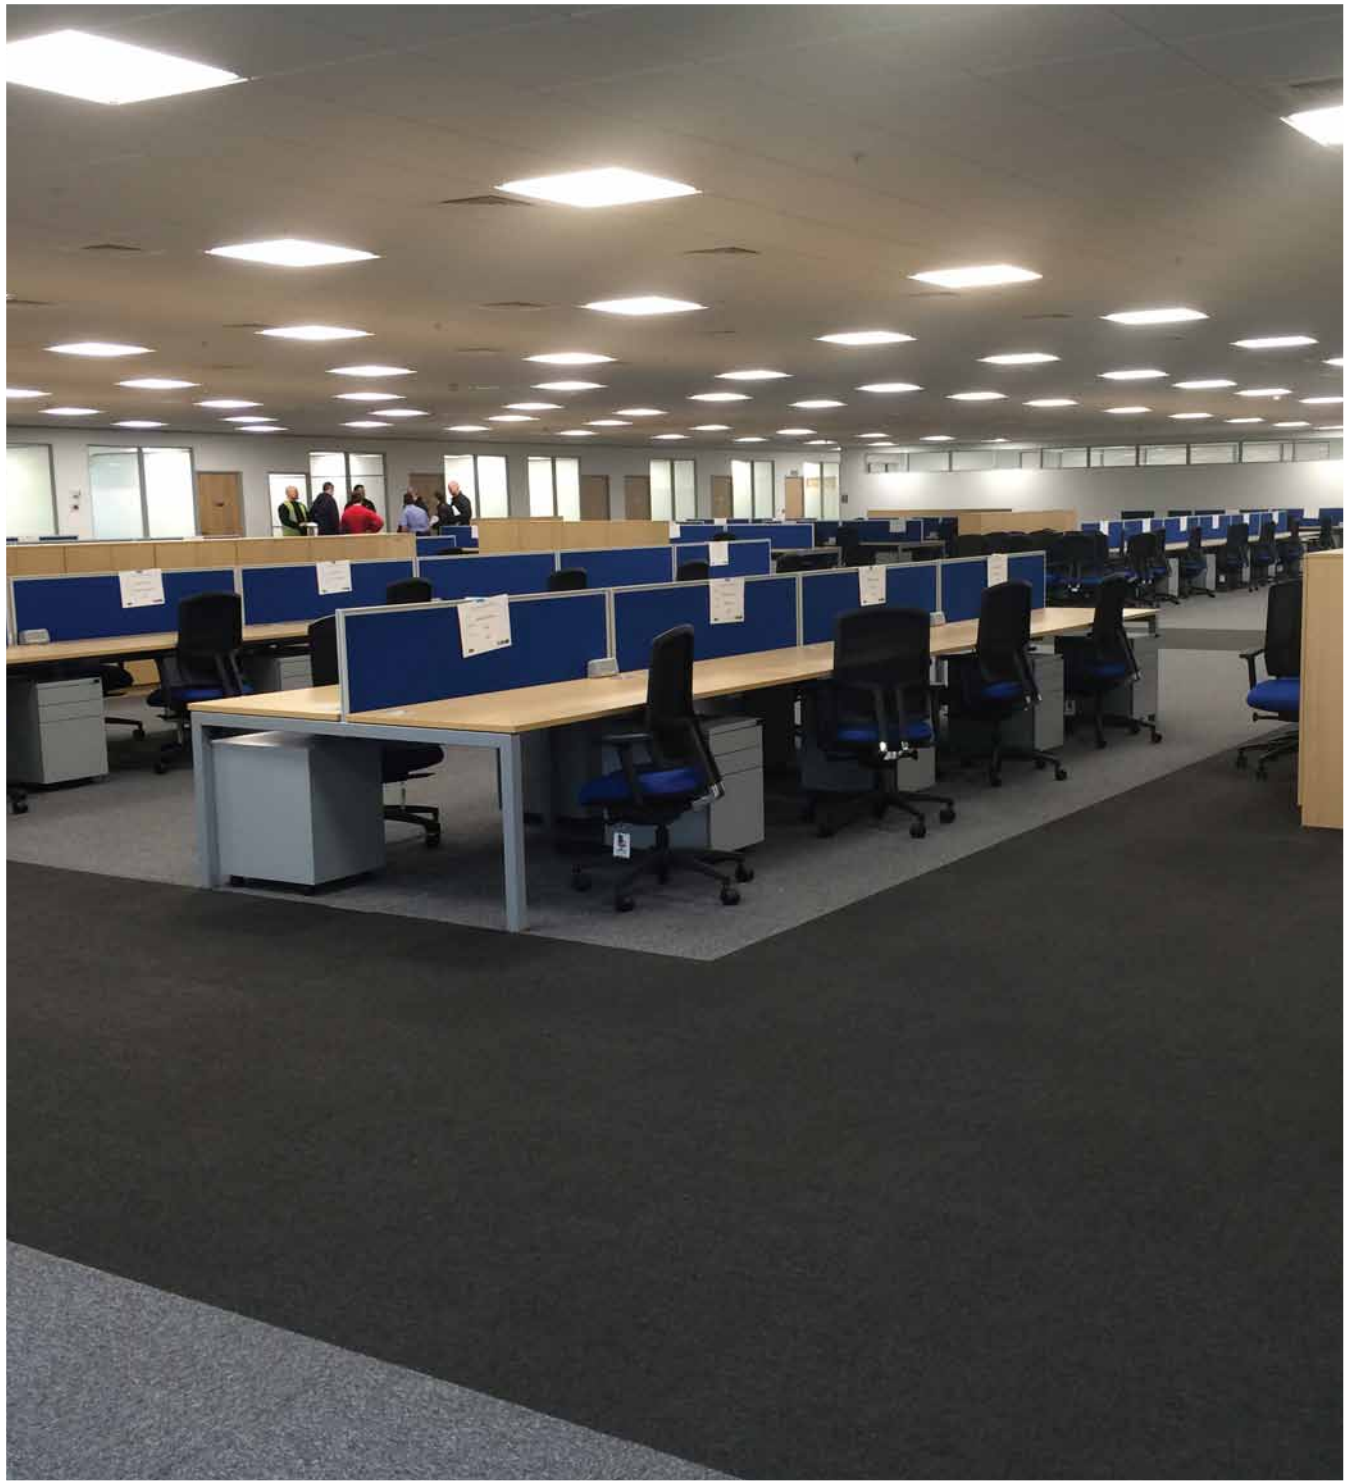

LINX Printing Technologies selected aci to space plan, supply and install the office furniture for their bespoke new facility in St. Ives.

Linx had already entrusted aci with several other projects and as a result were the obvious choice for their new facility. Matrix bench desking system from Elite Office Furniture was chosen for the majority of the space due to its ease of configuration and value for money when delivering a project on this scale. Soft and breakout furniture was also from Elite and the Felix operator chairs from Boss Design.

aci also manufactured and supplied the reception desk and magnetic / write on areas through out the space.
